Simona

Product Designer (UX/UI)

simona.nb@hotmail.com

PROFILE

Product designer with 5+ years in design, experienced in owning the entire UX/UI pipeline in B2B SaaS environments. Skilled in turning complex, data-heavy workflows into clear interfaces and building scalable design systems. Comfortable using AI tools throughout the design process.

PERSONAL PROJECT

Daruvaj.mk

2026

A gifting platform where people give a second chance to things they no longer need · Live

- Took the product from idea to launch independently: research, product definition, UX/UI and a custom design system in Figma.
- Implemented the design system in code with shadcn/ui, and built core features with AI as a development partner: user-to-user messaging, login and authentication, email notifications and an admin review flow.
- Gained a deeper understanding of the entire user journey and of how design decisions work in a real, live product, from the interface down to the data behind it.

EXPERIENCE

UX/UI Designer · ClearForward

Feb 2024 – Present

B2B SaaS for dental treatment planning · Amsterdam, NL · Remote

- Own the entire UX/UI pipeline across 20+ modules of the platform, from problem framing with the product owner to prototyping, handoff and design QA with developers.
- **Built the design system** from scratch in Figma: tokens, variables, components and documented patterns.
- **Core workflows:** cases, patients, production, products and store, plus role-based dashboards for four user roles.
- **Billing, admin and settings:** invoicing and billing, vouchers, referrals, user tiers, dental groups and practices, plus settings for payments, currencies, integrations and service codes.

UX/UI & Graphic Designer · Identity – creativity & advertising

Mar 2023 – Feb 2024

- Websites, landing pages and digital product screens for clients, from wireframes to high-fidelity UI, plus UI kits and brand guidelines.

UX/UI & Graphic Designer · Publicis Groupe

Aug 2021 – Mar 2023

- Web and mobile interfaces and digital campaigns for international and local brands, applying brand design systems across digital and print.

SKILLS

Design: UX research, user flows, prototyping, design systems, data-heavy UI

Tools: Figma, Adobe Creative Suite, HTML/CSS basics
